EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Aneesh A Mehta (Reg No: 61,937) on 09/09/2008.

The application has been amended as follows:

In claims:

Claims 60, 63, 68,71,72,73 have been amended to recite as below,

Claim 60: A base station comprising:

an antenna; and

a controller configured to at least one code division multiple access (CDMA) transceiver such that a CDMA connection with at least one CDMA user device is established, a CDMA control channel is established, data is received over the allocable code channels wherein the code channels are divided in time by radio

Art Unit: 2619

frames that are further subdivided into sub-frames, code channels are allocated on a sub-frame basis to support the received data wherein the allocation of code channels includes adding and removing code channels assigned to the at least one CDMA user device, and the CDMA connection is maintained with the at least one CDMA user device when code channels are not allocated to the at least one CDMA user device, wherein the CDMA control channel enables the code channels to be reallocated without reestablishing a code phase lock over the CDMA connection when data is not being received from the at least one CDMA user device.

Claim 63 (Canceled).

Claim 68: A method for use in a base station for communicating data between the base station and at least one code division multiple access (CDMA) user device, the method comprising:

establishing a CDMA connection between the base station and the CDMA user device;

establishing a CDMA control channel between the base station and the CDMA user device, wherein the CDMA control channel enables the code channels to be reallocated without reestablishing a code phase lock over the CDMA connection;

receiving data from the CDMA user device over allocable code channels, wherein the code channels are divided in time by radio frames that are further divided into sub-frames; allocating the code channels on a sub-frame basis to support the transmitted data wherein the allocation of code channels includes adding and removing code channels assigned to the CDMA user device, wherein the code channels are allocated on an as-needed basis, with the number of allocable code channels being variable during the duration of a communication session; and

maintaining the CDMA connection with the CDMA user device when code channels are not allocated to the CDMA user device.

Claim 71 (Canceled).

Claim 72 (Canceled).

Claim 73: The method of claim ~~72~~ 68 wherein an initially assigned code channel is deallocated when data is not being received from the at least one CDMA user device.

2. The following is an examiner's statement of reasons for allowance:

Claims 60-62, 64-70, 73-75 are allowed over prior art.

Claims 1-59, 63, 71, 72 are canceled.

The prior art fails to teach and render obvious the features as claimed in independent claims,

In claims 60, 68:

“wherein the CDMA control channel enables the code channels to be reallocated without reestablishing a code phase lock over the CDMA connection;”

“allocating the code channels on a sub-frame basis to support the transmitted data wherein the allocation of code channels includes adding and removing code channels assigned to the CDMA user device, wherein the code channels are allocated on an as-needed basis, with the number of allocable code channels being variable during the duration of a communication session.”

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled “Comments on Statement of Reasons for Allowance.”

3. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Venkatesh Haliyur whose telephone number is 571-272-8616. The examiner can normally be reached on Monday thru Friday 8:30AM to 4:30PM.
